

4.20 Myanmar

4.20.1 Myanmar National Biosafety Framework (2006)

The NBF for Myanmar balances the biotechnology development while protecting the national biodiversity to ensure human health through a series of multi- stakeholder consultations. The key components of a NBF includes policy, regulatory regime, mechanism to handle notifications to ensure safe transfer, to develop a system for "follow up" for enforcement and monitoring and to develop mechanisms for public awareness, education and participation.
